

Sandown F1 Air Race 2016

1970s Quarter Midget pylon racer. Cassutt with Supertigre 2.5cc engine

Stevie Malcman's fabulous 40% Cessna 182 departs runway 36

Victorian RC Drag Association provided non stop thrills n spills all day long. You can't believe how quick these cars are

Victorian RC Armoured RC Club didn't step on anyone's toes. Tanks a lot!

My Dad met my Mum at Air League in the 1950s. (*Suitors at Sunbury and Moorabin Squadrons please note, the practice of fisti-cuffs outside is not tolerated today*)

ATTRACTING NEW PEOPLE

Sandown is an Airshow. It was never an Air Race. F1 was just a component of inspiring young people to have a go at RC flying. By demonstrating excellence. In the 1970s I won a \$15 cheque for 2nd place in a QM race. At Sandown Neil Addicott took home a grand for 1st, in front of 4500 people. Since Adelaide Golden Era 1997 I have devoted many column centimetres to Air Racing. The reason? It was a great idea, which also happens to be fun. Every hobby has a showcase event. This could be Victoria's. *Stephen Green.*

In 1974 my rubber powered Guillows Sleek Streak landed behind the crowd control barrier.

Lane Horsey distracted the guard so I could retrieve my \$1 model. It landed in the wheel well of the RAAF's brand new pride and joy.

The F-111. Four inch (100mm) mesh is the new standard. Soccer netting contained all the MAAA supplied chuck gliders!

The second heat of F2 bought a tear to my eye. You could have heard a pin drop as the young guns made us all proud

I want a good clean fight. Those 5 exhausts echoed through the grandstand at 240 kph and that race went off!

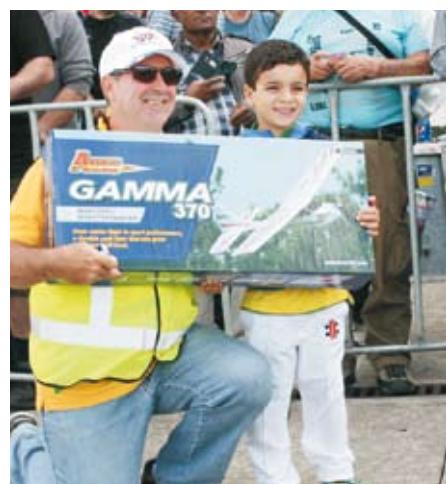

Market leading Model Engines continues to do what it does best

Thanks to Betta Home Living and Kennards sponsorship

Bryan Harper made sure no one left until the winning ticket numbers were announced to take home two fabulous TCL LCD TVs

And a few Gammas. Is this where the next David Law or Chris Callow will come from?
